

PRESS RELEASE

Focus EDL adds advanced frequency control devices to its product portfolio

Focus EDL, the leading electronic components distributor specializing in providing the communications and high-performance datacoms industries with a broad range of products from the United States, Asia and Europe, announces that it has added leading frequency management specialist Raltron to its franchise line-up.

Established 25 years ago, Raltron is recognised as an industry leader in crystal and oscillator technology producing a very broad range of frequency control products from simple tuning fork crystals up to high stability oven controlled crystal oscillators.

Raltron's frequency control products are used in a wide variety of applications and are particularly sought after by those specifying and building high speed data systems and wireless networking products. Key products now available to Focus EDL's customers include SAW filters, quartz crystals from standard microprocessor to custom tight stability specifications, custom oscillators including VCXO, TCXO and OCXO devices and crystal filters and ceramic resonators.

The agreement, which covers the UK and Ireland, has immediate effect.

"We are really pleased to be partnering with Raltron," says Geoff Philpot, Focus EDL's managing director. "The company's reputation in the frequency control space and the quality of its products combine to make Raltron a valuable addition to our list of suppliers".
